

Super Heavy Forklift

K.

Big challenges made easy DCG600-850

Ready to take on your heaviest loads

Meet the most powerful range of lifters, the Kalmar Super Heavy Forklifts.

Capable of lifting loads from 60 up to 85 tonnes, they can handle your toughest loads with ease. Ideal for steel mills, foundry, wind turbine components and sub-sections, precast concrete or other heavy lifting applications and industries.

Quality you can trust

With over 100,000 built since 1949, Kalmar forklifts are known for their great build quality and reliability. With less moving parts, easily accessible servicing points and industry leading maintenance intervals you will experience less downtime and higher availability rates. Coupled with Kalmar's global support and service network, plus long warranty periods, you will have a machine you can rely on.

Highly productive

No matter what you are lifting, the new Kalmar Super Heavy Forklift will do it efficiently, effectively and safely. It can lift the heaviest loads without compromising its maneuverability, agility or the safety and comfort of your operator. With a highly efficient and powerful driveline, you can expect a forklift that will become a central part of your logistics chain.

Safety in focus

Kalmar's range of diesel powered 60-85 tonnes forklift trucks offer highly responsive handling and superior visibility from the cabin, helping to keep your driver safe and in control at all times. Your drivers and co-workers will also benefit from the reduced noise and vibrations with a smooth and diesel powertrain. There are also a large range of safety options available that can further enhance the safety of your equipment and the drivers operating them.

A full range of diesel powered forklifts

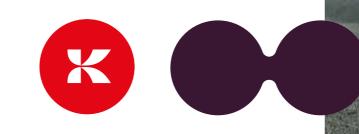

Kalmar has offered an extensive range of diesel powered forklift trucks since the 1950's with over 100.000 units sold. Kalmar offer 4 diesel ranges, starting with 10-18T (medium), 18-33T (heavy), 38-54T (big heavy) and the gigants 60-85T (super heavy). We can work with you to configure a solution that fits exactly your requirements.

Four good reasons to choose Kalmar

Highest productivity

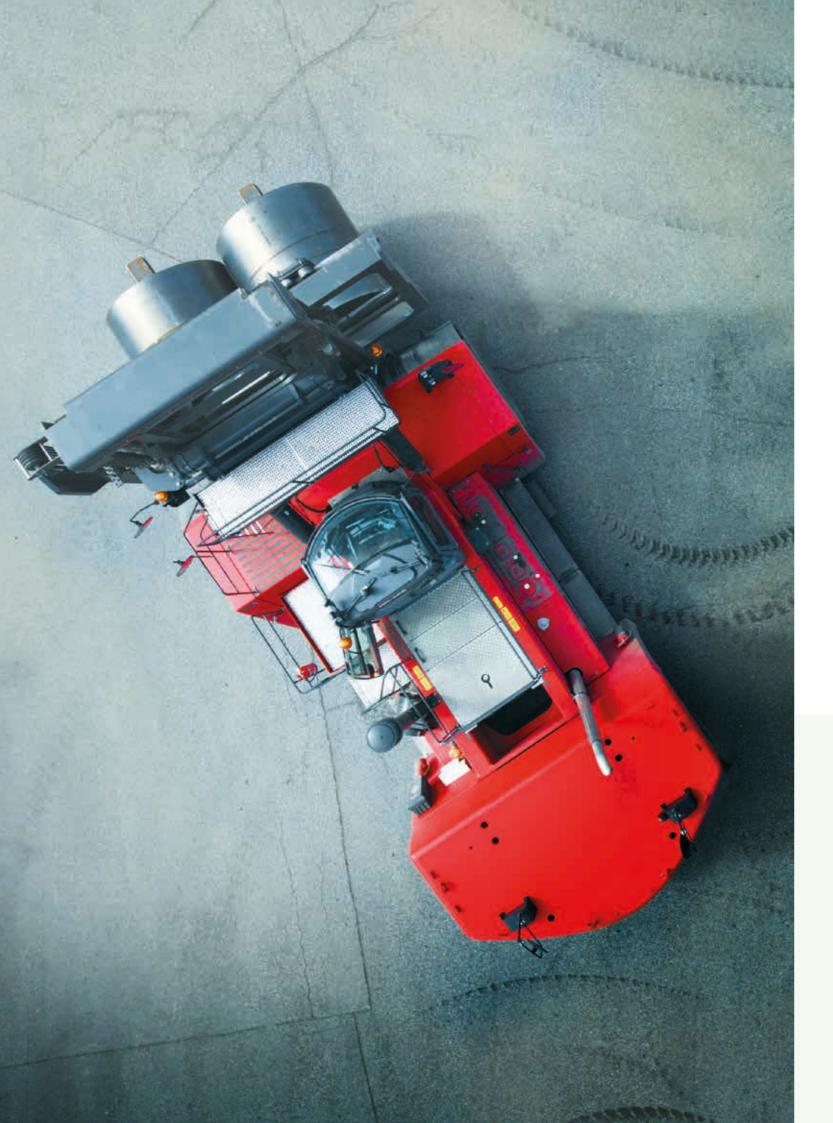

- Trusted and reliable partner
- Better total cost of ownership
- · Great ergonomics, visibility and safety.

It is no surprise that customer survey results coincide with Kalmar core values. After all, we listen attentively to customers when designing and developing our forklifts. Looking at the big picture, adding up things that truly matter, it will always pay off to choose Kalmar.

Built for maximum productivity

Your Kalmar forklift will always deliver what your operations require. With Power Mode activated, operators will have the power necessary to go all-in at every instant and work with maximum productivity. Pushing it hard, while ensuring best-in-class fine-manoeuvring.

Our Cummins and Volvo engines are powerful, yet highly fuel efficient. You have a choice of engines which are compliant with EU Stage IIIA / EPA Tier 3 (Cummins) or EU Stage V / EPA Tier 4-Final (Cummins & Volvo).

All of our heavy forklifts come fitted with load sensing hydraulics (power-on-demand) as standard. The variable pumps automatically sense the load in every operation and adjust the oil flow accordingly, allowing

Eco Drive Modes

Choose between three different drive modes, each optimised to meet your operational requirements. The forklift can be adapted to every task at hand, shifting many times during the day. The operator easily shifts between modes by using the cabin display screen.

Power

Normal

Brings out the maximum performance of your machine, allowing you to increase the number of tonnes moved per hour.

Balances power and economy to optimise profitability and reduce fuel consumption by up to 15%.

Save up to 15%

for faster lifting cycles up to 40% while reducing fuel consumption. This will help to improve your productivity as you can do more lifts per hour.

Many operators testify to the forklift's improved operational capabilities, especially when fine manoeuvring, such as side-shift and fork positioning. Also, the lowering speed has been increased, preparing the machine faster for the next lift.

Economy

If total cost of operations outweighs the need for performance, Economy Mode reduces fuel consumption by up to 25%.

Reducing lifetime costs

Purchase price is only one of many factors affecting total cost of ownership. In fact, price is a minor cost factor looking over the lifetime of your forklift. What truly matters in the long run is cost control and operational efficiency - and that will show clearly on your bottom line.

Compared to our previous model, the new DCG600-850 uses up to 15% less fuel in standard configuration. Add Kalmar's renowned product quality and reliability, increasing efficiency and uptime, and you see the true value of Kalmar.

The forklift's variable pumps and fan are automatically adjusted to the precise need. The pumps and the fan are only operated at full speed when necessary, reducing fuel consumption and noise. Another cost saving feature is Economy mode, an engine setting available to the operator from within the cabin, which further lowers fuel consumption.

The risk of unplanned standstills has been reduced due to intelligent error detection built into the new control system, which accurately pinpoints potential problems in clear text on a display in the cabin.

Lifetime savings

Purchase price represents only a small part of the total cost of ownership. What matters in the long run is reducing operational and maintenance costs. And that is what Kalmar is all about

Environmental Purchase Resale value price savings

- Powerful and fuel efficient diesel engines. The latest EU Stage V (EPA Tier 4-Final)
- \checkmark compliant engines from Cummins and Volvo reduce fuel consumption by up to 5%.

Standard with Eco Drive Modes [EDM]. When optimising the setting with the EDM,

 $\overline{\mathcal{A}}$ the fuel consumption can be reduced by up to 25%.

Energy efficient sub systems.

Optimised load-sensing hydraulics with piston pumps and variable cooling fan allows for savings up to 10%.

Increased uptime.

Longer service intervals and improved problem detection reduce downtime.

Total lifetime savings.

Adding all energy saving features, savings up to 40% are possible.

Maintenance savings

Operational savings

Designed for the driver

Kalmar Forklifts come fitted with our ergonomically designed EGO cabin. With slim line a-pillars, adjustable seating, steering wheel and control panel, your drivers will benefit from a superior operating environment and visibility.

More comfortable

With a choice of comfortable driver seats, a fault safe pedal system and powerful Electronic Climate Control system with smarter controls your operator will benefit from improved ventilation heating and cooling, plus a cabin with superior comfort and lowest noise level inside and outside.

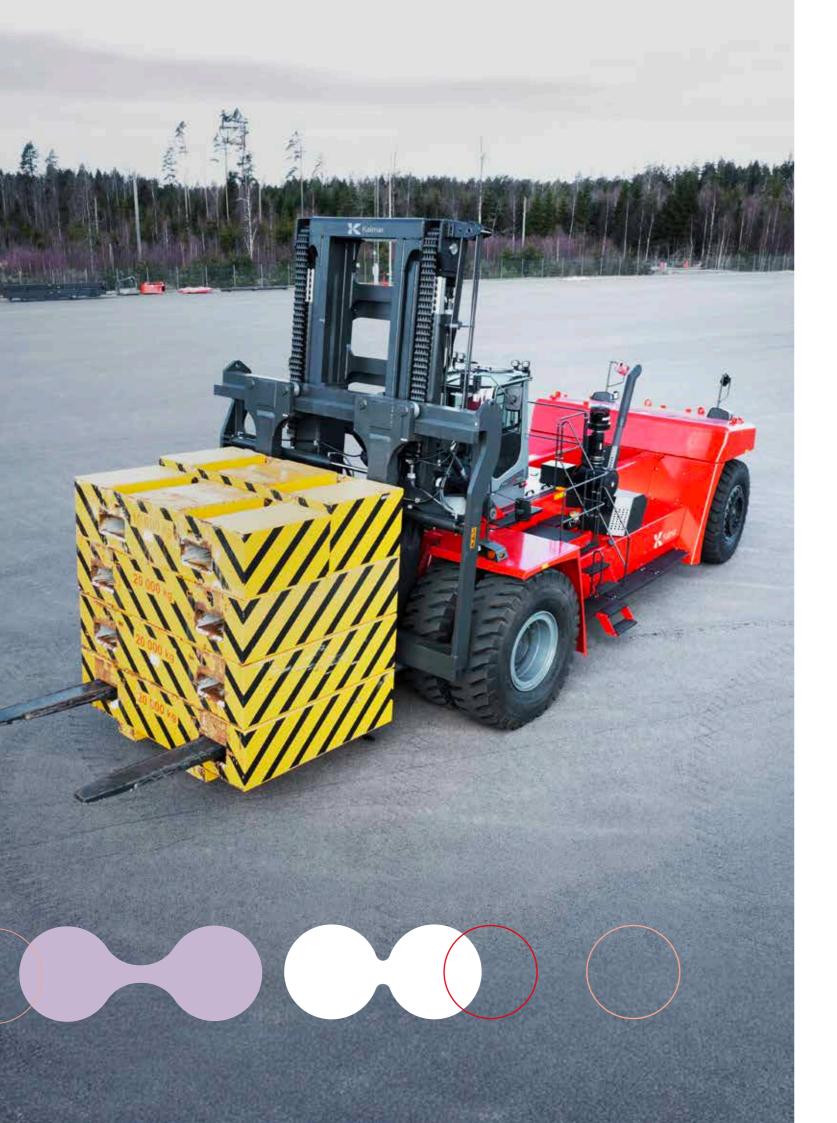

Our diesel powered forklift trucks give you a wide choice electric-servo lifting levers, dual lever joystick or single joystick, an electronically adjustable work console and side tilting steering wheel. All designed to make operating your forklift easier and more efficient to operate.

Easy to operate

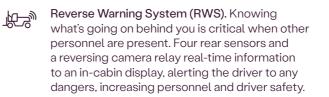

Extra smart

Our intuitive user interface combines visibility, sound and touch to create a perfectly balanced operating environment with an intelligent colour display at its heart. Advanced diagnostics, and smart settings allow improved operational control.

Choose your own upgrade options

Heat Protection Package. To protect your machine and operator from extreme heat generated in foundries, where molten metal can reach 2000°C. All hoses in the mast and carriage are heat protected and an extra windshield is fitted to protect the cabin from splashes from the vat.

Alco-Lock. To ensure your driver is at their best when operating your equipment you can install an Alco-Lock system. This system makes sure that the driver meets alcohol blood level standards before being able to start the machine, much like a breathalyser.

Reversible Engine Fan. If your forklift needs to operate in a dirty and dusty environment then a reversible fan can help keep your driveline cleaner and operating optimally.

Reverse Beeper System. When your staff are working side-by-side with moving vehicles there is always a safety risk. Installing a reverse beeper system provides a clear acoustic alert when the machine is reversing so personnel can make sure they stay out of harm's way at all times.

Tyre Pressure Monitoring System. Helps to reduce wear and tear on tyres which results in reduced fuel consumption. Bluetooth sensors keep the driver advised of the condition of the tyres at all times. Active care of your tyres can result in a 10-40% increase in tyre life and up to a 10% decrease in fuel consumption.

Additional lighting. If you have to operate your machine at night, extra lighting can bring greater operational visibility and safety for personnel. You can choose additional LED working lamps on your cabin roof, on the mast or placed at the front or rear of your forklift.

What do you need to lift?

Choose between a wide range of lifting masts, carriages, forks and attachments. We offer complete solutions whereby we assemble the attachment in the factory and integrate it with the forklift's other functions.

Metal industry

Our heavy diesel powered forklifts can lift, stack and transport metal slabs, bloms and billets or plates, coils, bars and pipes, which is made even easier and safer when you use speciality attachments including magnets, clamps, grippers, coil rams, forks or slings fitted to the lifting equipment. Also raw material supplies and recycling can be handled.

Concrete, energy and heavy industry

Flat, round or bulky concrete sections, wavebreakers, bricks and rocks can be lifted with ease, as can hardware for the energy sector: like supplies for oil & gas offshore sites, or biomass and nuclear plants. Heavy loads for the wind turbines and their sub contractors; producing foundations, mono-piles, tower sections, nacelles, drive units and blades can also be lifted and moved safely and efficiently.

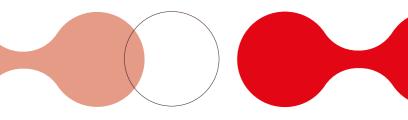

Special and customised

Kalmar has a long tradition of delivering highly customised solutions that solve our customers' individual handling demands and challenges. Using our wide range of solutions, with tailor-made specifications and dedicated forklifts that will do the job with precision, efficiency and with low total cost of ownership (TCO).

Logistics and stevedoring

Whether you're moving containers, handling various types of breakbulk, heavy project cargo or RoRo applications - Kalmar can deliver the efficient and safe material handling solution that you need.

Safety fitted as standard,

100

All Kalmar equipment is compliant with EN 1175:2020.

At Kalmar, the safety of people working with our machines is always at the top of our minds, which is why meeting global safety standards is important to us. The safety standard EN 1175:2020, which sets the electrical and electronic component standards for industrial trucks, has been updated to improve the safety of these machines while in operation. This update is valid from April 2023. All Kalmar counter balanced machines, including reachstackers, empty container handlers and forklifts have been updated to meet this new standard to ensure that working with a Kalmar machine is as safe as it can be.

For Kalmar, the safety of your drivers and maintenance staff is of critical importance, which is why our machines come with many more safety features fitted as standard than other machines available in the market.

The features listed here come fitted as standard on all Kalmar machines. You can enhance your employees safety further by fitting your machine with our additional safety options listed on the following pages.

2-point seat belt. Ensures that your driver is safe and secure while operating our equipment, all Kalmar machines are equipped with an adjustable 2-point seat belt system.

Ο'

3-point Contact System. Makes sure your drivers are safe when entering or exiting our equipment. \dot{O} \dot{O} All machines are fitted with steps and handles to ensure they can always maintain three points of contact with the vehicle, helping to keep them safe and preventing incidental injuries.

> Double brake pedals. To avoid driver leg fatigue, every machine is equipped with dual brake pedals which require only heel to toe movements, allowing the driver to move his foot between the accelerator and brake pedals without having to move their leg.

Q

Steps with anti-slip protection. To reduce the risk of your driver slipping or falling on our equipment, all entering and exiting points are fitted with non-slip surfaces giving them extra grip, so your drivers stay safe.

Control System. All our equipment is fitted with an electronic Control System for monitoring the machine's different functions while in operation, helping to keep your driver fully informed at all times with up-to-date Operating, Event Controlled and Error Code information.

Operating information. Our equipment's Control System provides several operating information menus, which give your operator and maintenance personnel a great insight into the on-going performance of the machine, allowing them to keep it running optimally.

Event controlled information. Provided through the Overload Protection System to warn the driver through the equipment's Control System if their load exceeds the specified safety limits.

Error code information. Should there be any issue with your equipment while in operation, the electronic control system will immediately alert your driver with the appropriate error code, so they know exactly what is going on and can take appropriate action.

Display. Cabins are fitted with a large easy to read display which keeps your drivers fully aware of the machine's on-going performance and any maintenance actions that need to be taken

Control Breaker System for load handling.

All of our equipment is fitted with a Control Breaker System, which automatically shuts down the load handling system should a fault occur, until the fault has been corrected. Keeping your driver, equipment and load safe.

Operator Presence Detection System. Maintains the highest levels of safety for both the driver and pedestrians, as all our equipment is fitted with an alarm or visual indicator that comes on automatically if:

- The driver does not fasten their seat belt while in operation.
- The driver leaves their seat without engaging the parking brake.

In addition, if the driver leaves their seat while the machine is operational, the transmission is automatically shifted to neutral and loadhandling functions are disabled.

Engine/transmission Protection and Warning Systems. Warning systems, designed to protect your machine's driveline in case of higher than expected temperatures or a pressure build up, are standard on all equipment, avoiding unnecessary mechanical failures.

External reverse light. For the safety of others, all our equipment is equipped with external reversing lights that help the driver keep everyone informed that they are moving backwards.

LED lights. These come fitted as standard on all our equipment, providing better visibility when working in reduced light than halogen lights.

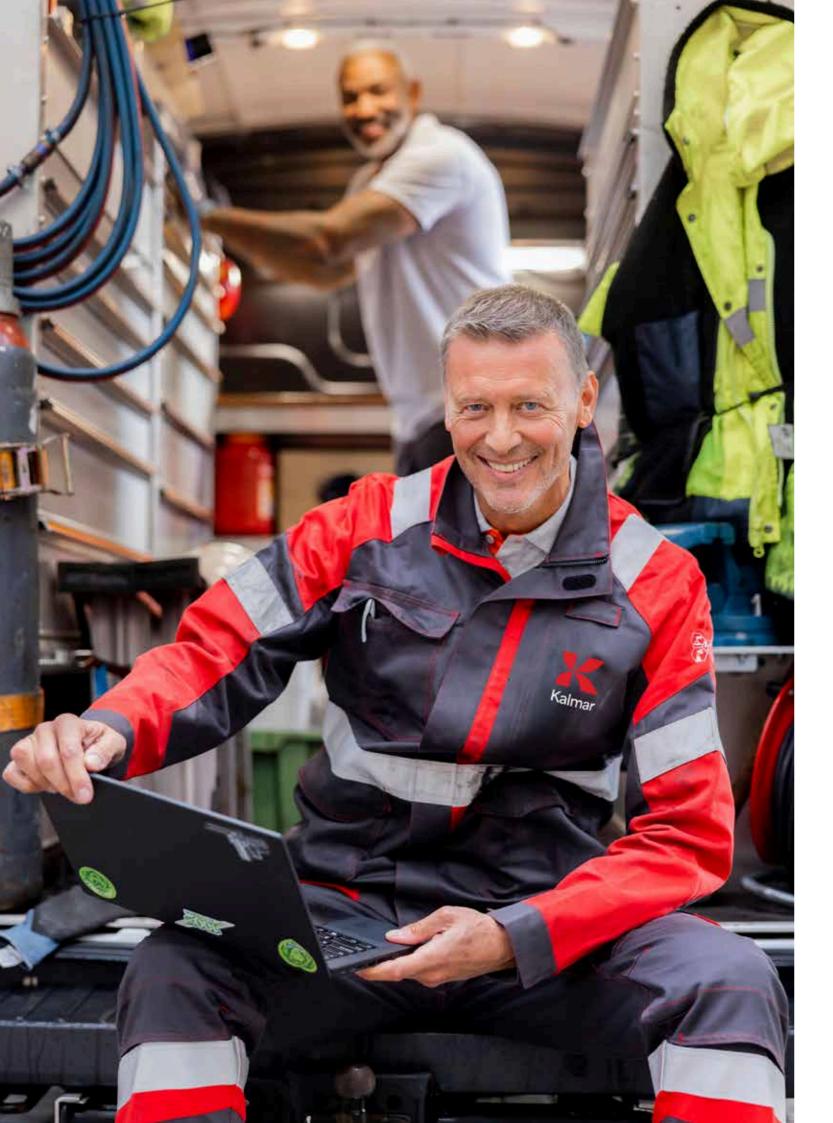

Neutral start switch. A neutral start switch means your driver can't start his machine while it is in gear, preventing any damage to the driveline and any uncontrolled equipment movements.

Protection against falling objects. Cabin roof windows on all our equipment are fitted with high strength materials which can withstand heavy blows, helping to protect your drivers from falling objects.

Good visibility. Kalmar cabins provide your drivers with excellent visibility, forwards, upwards, sideways and behind them to help them stay safe while in operation.

Keep moving with Kalmar Services

To keep your business moving Kalmar Services offers a range of services that can help you keep your equipment moving optimally.

Kalmar Care

Care that keeps your business moving.

With Kalmar Care you get a flexible service that's built around your business. Including, the experience and knowledge of Kalmar's dedicated staff, coupled with transparency and increased predictability of costs.

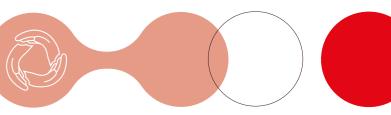

Kalmar Care is available in three different service models: our two customisable contracts – Essential Care and Complete Care - and our flexible solution On Demand Care.

Service models:

Essential Care A maintenance solution to keep your equipment in an optimal condition.

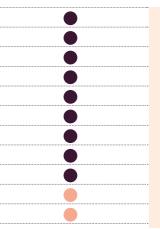

Maintenance Planning	
Preventive Maintenance	
Predictive Maintenance	
Corrective Maintenance

Battery Maintenance	

Optional Included

Complete Care A complete service solution providing piece of mind and maximum equipment uptime.

On Demand Care Top-of-the-line service whenever you need it.

Top-of-the-line service whenever you need it

MyKalmar

Keeping your cargo moving.

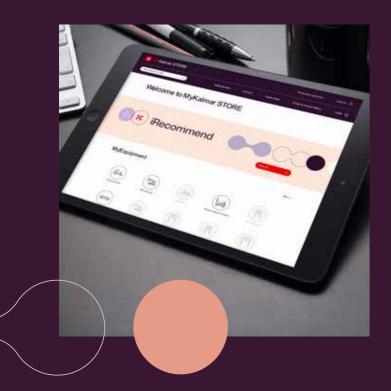

The MyKalmar portal brings together many of Kalmar's digital services into one place. With a single point of access and a user-friendly design you'll benefit from greater visibility and control over your maintenance activities, parts ordering and equipment performance - helping you improve your operational performance, safety and efficiency across your entire fleet.

Kalmar Insight

Optimise your operations with Insight.

Kalmar Insight* is a performance management tool for cargo handling, which gives you an easy to use overview of your fleet operations, by aggregating data from multiple sources, including equipment built by other manufacturers. Review your entire fleet activities, schedule maintenance activities and order the required parts

MyKalmar STORE

MyKalmar STORE is your one stop shop for all the parts you need which is accessible through MyKalmar. Open 24/7, accessible on any screen and available in different languages, MyKalmar STORE stocks 100s of thousands of Kalmar Genuine Parts at any given time and we can have them delivered quickly to you, no matter where you are in the world. You can search, order and then track your order all through the same application. MyKalmar STORE has been designed to make your life easier.

Kalmar Training

Enhance your skills.

To get the most out of your new machine our training centre offers a range of courses for both your technicians and operators. Operators can be taught how to drive the machine for optimum performance and minimum waste, and to learn what needs to be checked daily for optimal safety. Technicians can be educated with the knowledge they need to keep your new equipment in top condition in a safe way. Courses are a mix of theory and hands-on experience. automatically. All enabling you to take action on real-time information, that will help improve your overall operations immediately. Kalmar Insight comes fitted and ready to be activated in all new Kalmar equipment, it can also be retrofitted into existing Kalmar equipment or those built by other manufacturers.

*Installation costs and/or an annual subscription fee may apply.

- Additional equipment for roadtraffic (LGF-sign)

Camera safety

- Modular full HD solutions (1920x1080p)
- · Extra front mast camera to cab monitor
- · Extra front carriage camera to cab monitor
- Radar warning sensors rear (2x) to cab monitor
- Monitor 7in Quad, max 4 connections (repl Dual)
 Monitor 10in Quad, max 4 connections (repl Dual)
- DVR recorder, up to 4 channels.
- with SD-card (128 GB) · 360 birdview camera solution (not with sliding
- cabin)

Information Systems

VDI - Vehicle Data Interface

Fleet Management (Kalmar Insight)

- Insight licence (only certified countries)
- Insight Driver Monitor (RFID reader + 10 driver tags) Insight extra driver tags (10 tags)

Colour

- Other RAL colour than standard, chassis
- Special and multiple colours, chassis
- · Other colour than standard, striping foil
- Reinforced anti-corrosion protection

Documentation & Decals

- Extra set of documentation
- Workshop manuals
- Load chart lbs/inch in cab & sign "no riders"
- Documentation on memory stick

Training

- Training packages (driver, service, maintenance, software)
- Contact Kalmar Training Centre for more information

Warranty

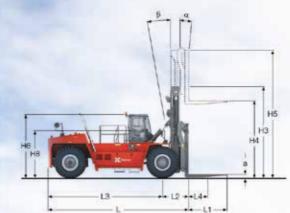

- Additional warranty packages available: Gold (complete forklift): max 5 yr/10.000h

 - Silver (drive line): max 8 yr/16.000h
- Bronze (structural parts): max 10 yr/20.000h Contact Kalmar for more information

Specifications
